

Raw Data for Number of Titles for Genre and by Dewey Sections

unfortunately, when the parent participation programmer and I build this zel program, we did not design it for holding on to statistics on circulation

so every time a book is returned, its record is deleted pure and simple from the circulation table.

FIRST these are the codes for the entire collection as entered in the database

(this is nothing to do with circulation ... just inventory from last time inventory was done)

I spent a bit of time cleaning up the title_loan_code fields

```
select count(*), upper(trim(title_loan_code)) as k from titles group by k order by k;
```

please ask your DH if you need help calculating the percentages

307 | (empty - nothing entered)

and now the stats for the books currently in circulation:

```
select count(title_loan_code), title_loan_code as k from circulation c join barcodes b on  
(c.barcode=b.barcode) join titles t on (b.realkey=t.realkey) and date_begin>'2011-08-30' group by k  
order by k;
```

count | k

1 | French ficiton.

367 | French Fiction

73 | French Non-Fiction

3. For each dewey decimal class of the French non-fiction section (000, 100s, 200s, 300s....900s):
average age, number of titles, % of collection, value and if possible circulation stats

```
select count(call_number) from titles where call_number ~'0[0-9][0-9][\.\s]' and call_number !~*'fic';
```

the dewey breakdown in the inventory, and in the current circulation; value in brackets and in dollars rounded off)

dewey 000's: 49 (\$385) items 0 items in circulation

dewey 100's: 72 (\$710) items 1 (\$10)

dewey 200's: 106 (\$723) items 0

dewey 300's: 402 (\$4606) items 7 (\$123)

dewey 400's: 6 (\$68) items 0

dewey 500's: 1043(\$10279) items 15 (\$176)

dewey 600's: 413 (\$4468) items 2 (\$20)

dewey 700's: 560 (\$5774) items 16 (\$170)

dewey 800's: 70 (\$834) items 1 (\$26)

dewey 900's: 378 (\$8777) items 3 (\$52)

FIC: 6581 (\$49898) items 290 (\$3172)
